Ropes That Rescue is proud to announce Sedona Fire Department HOSTED programs! The Sedona-Oak Creek Canyon of Arizona is a tourist destination spot for the Southwest. The towering red sandstone cliffs of the Mogollon Rim are the perfect backdrop for RTR structural tower programs. The area also has some of the best mountain biking in the US.

Many students fly into Phoenix Sky Harbor airport, rent a vehicle and drive for 2 hours north on Interstate 17 to AZ State Route 179 (Exit 298). You will drive through the Village of Oak Creek at the foot of Bell Rock and enter into the scenic Red Rock Country that Sedona is so famous for. High clearance vehicles may be required for this program.
Later in the week the schedule will take us to venues into the historic towns of Jerome and Prescott which is a good 1 to 1.5 hour drive from Sedona. Be ready to car pool. Again, a high clearance vehicle may be needed.

**LODGING:** Village of Oak Creek (VOC)

1) **Days Inn Kokopelli**: 6465 Hwy 179 VOC (928) 284-1100 - 2 star
2) **Desert Quail Inn**: 6626 Hwy 179 VOC (928) 284-1433 - 2 star
3) **La Quinta Inn**: 6176 Hwy 179 VOC (928) 284-0711 - 2 star
4) **Bell Rock Inn**: 6246 Hwy 179 VOC (800) 438-2929 - 3 star

You may also wish to rent a local house or cabin for the week if you have several together. Check with VRBO.com for Sedona. Try and get accommodation in VOC as it is quite a ways from Sedona proper. If you are looking for high end accommodations, please contact us for that information. There are 4 and 5 star hotels in the area.

Please plan on staying through the evening of the last day of the program as we do not get out early!

**IMPORTANT:**
The final day of all RTR programs is Hawaiian shirt day. Please bring a Hawaiian shirt to receive a FREE RTR embroidered hat!

**KNOTCRAFT FOR THIS ROPES THAT RESCUE WORKSHOP**

Here is a list to get you started:
- Figure of eight on a bight
- Butterfly knot
- Double overhand stopper
- Double overhand noose
- Inside bowline with retrace
- Bowline with a bight
- Doubled long tail bowline
- Bowline on a bight
- Water knot in webbing
- Water bend in webbing
- Munter hitch
- Clove hitch

It is advised that you be familiar with some of the knots, bends and hitches we will be using in this workshop. It is always best to have some under your belt before arriving. Much of the workshop you are attending depends in large part on the roped and webbing connections YOU form! Don’t worry so much at this time about the somewhat exotic knots like the retraced double bowline but concentrate on the easier figure of eights and simple bowlines. We will be going over many many different knots which are somewhat useful for rigging. Be prepared to tie some new ones!
